1. OPERATING INSTRUCTIONS

1. Blower
    a. Press and hold Blower button for ~2 seconds to turn ON. The Blower will start on the highest fixed blower speed setting of "6".
    b. To adjust the "fixed" blower speed setting, tap the Plus or Minus buttons. The Blower has six fixed speeds that can be adjusted from "6" to "1".
    c. Press and hold the Blower button to turn Blower OFF.
2. Pulse/Wave
    a. With Blower on, tap Wave/Pulse button to turn ON Wave
    b. Tap again to switch to Pulse.
    c. Tap again to switch back to Wave.
    d. To exit Pulse/Wave, tap Blower button once to resume Speed 6, or press and hold Blower button to turn OFF.

2. FAQ & TROUBLESHOOTING

1. What do I do if the Blower does not turn on?
    a. Check electrical connections to the Blower.

2. Why does the Blower come on by itself?
   Fifteen minutes after operation the blower will start a cleaning cycle to purge the lines of water and dry the Blower tubes.. During this cycle the control pad will not turn the Blower off when pressed. After three minutes the Blower will automatically turn off.
