SPECTRUM™

THE COLOR OF INNOVATION

A COMPLETE PLATFORM FOR FLEXIBLE DESIGNS & NEARLY UNLIMITED COLORS

MATCHING CONTROLS CREATE A COHESIVE STYLE FROM TOP TO BOTTOM

THE PLATFORM-BASED FLANGE REQUIRES MINIMAL TOOLING FOR NEW JET DESIGNS

Experience innovation with the industry first radial texture flange. Combined with a high polish stainless Halo accent, these jets set a new standard in jet face design.

NEW RADIAL FLANGE TEXTURE

HIGH POLISH STAINLESS STEEL HALO ACCENT

OPTIONAL STAINLESS STEEL NOZZLE RING

ACCENT

CMP INNOVATION: THE SPA INDUSTRY'S FIRST RADIAL TEXTURE JET FLANGE

The new CMP Radial Texture adds sophisticated excitement and energy.

The precise radial etching creates a luxurious high-end appearance. This break from traditional dot pattern flange textures creates an innovative new flange look and feel.

Spectrum Duo-Tone is an economic jet program that will add color and excitement to a hot tub design. The combination of color with the new radial texture will elevate your compositions.

NEW RADIAL FLANGE TEXTURE

THE SMOOTH HALO ACCENT CONTRASTS WITH THE CMP RADIAL TEXTURE

NEW TITANIUM COLOR FLANGE OPTION

The new Titanium color flange option provides a warm tone metal texture that will upgrade your jet designs. The Titanium color was created to complement warm tone acrylic shells that are very popular in the modern spa market.

SPECTRUM
DUO-TONE

EMOTIONAL LED LIGHTING

A complete, cohesive LED program that is compatible with LED systems from every major LED supplier. Optix is built around thoughtful designs that are easy to install for both interior and exterior.

INNOVATIVE, UNIQUE, CO-MOLDED DESIGNS

STAINLESS STEEL OPTIONS

CLEAR OR DIFFUSED POLYCARBONATE LENSES

OTX-3 STAINLESS STEEL DIFFUSED

THE FIRST ACCENT SPA LIGHT
WITH A STAINLESS STEEL OPTION

OPTIX

OTX 1000 SERIES

A BURST OF INTRIGUE AND STYLE

Optix LED fittings can be color matched to jets and other components. The unique hooded design allows for applications above the water line without creating a harsh glare.

OTX-3 GRAPHITE DIFFUSED

OTX-3 GRAPHITE CLEAR

OPTIX™

CUSTOMIZEABLE CUPHOLDER

The first cupholder designed
to survive in the "gas zone."

The new CMP cupholder
protects your custom
design and logo from fading,
while also providing a built-in
glare and hot spot shield.

Additionally, the accent ring
creates an opportunity to
coordinate with other spa
components for a balance in
color, texture and design.

CONCEPTS

OPTIX CUSTOM DESIGNS

The Optix product line was created with the understanding that LED lighting should be exciting and beautiful. Our platform based product line allows any spa OEM to create a unique look and feel without the expense of custom tooling.

Contact CMP today to see how our design and engineering team can create an emotional lighting solution to elevate your hot tub designs.

aqua effects

EXPERIENCE LIQUID COLOR

Aqua Effects water features from CMP create a nature-inspired look and feel. Gently cascading water flumes mimic the sounds of nature and add ambiance to your designs.

FAST HOLE SAW INSTALLATION

COLOR CRYSTAL

A spherical, translucent water feature that rotates and is illuminated with a bright blue light. It sits on a dark, curved base.

ROTATING COLOR CRYSTAL

A wide, shallow waterfall with water cascading over a dark ledge. The water is illuminated with a vibrant green light.

COLOR CASCADE
WATERFALL

A small, dark, dome-shaped water feature with a blue light emanating from its base. Water is flowing out of its side into a pool.

LED SCONCE
WATERFALL

A close-up photograph of a hot tub's water feature. A black circular cap is being lifted, revealing a bright purple LED light underneath. A powerful stream of water is being ejected from the opening, creating a wide, fan-like spray. The background is dark and out of focus, showing parts of the hot tub's interior.

AQUA EFFECTS
FAN

aqua effects™

The Aqua Effects collection of LED-Ready water features will add liquid color and excitement to any hot tub design.

SIMPLE | QUICK | RELIABLE

FORWARD THINKING ENGINEERING

The SQR system applies basic laws of physics to create a superior seal, while addressing the issues created by typical torque compression systems. The patent pending jet body design used with the patented grommet gasket is the most cost effective way to install a spa jet.

Unlike typical jet systems where two people are required to install a jet, SQR can be installed by a single person. Labor cost and time is immediately cut in half.

SQR is a revolution in thinking that provides the reliability required in the modern hot tub manufacturing environment.

FEWER TOOLS REQUIRED:

No expensive sealants, no torque wrench and no backside surface grinding.

FEWER COMPONENTS

A single SQR grommet replaces all other gaskets, nuts, and compression rings.

A SUPERIOR SEAL

Fewer chances for errors translates into a more reliable jet installation.

JOIN THE SQR REVOLUTION

FLOATING VANE WEIR SKIMMER

A BETTER SPA SKIM FILTER – BY DESIGN

The CMP Floating Vane Weir Skimmer is an improvement on an essential part of spa design. The floating vane weir design ensures consistent flow through the skimmer, even as the water level rises and falls. This constant, even flow creates cleaner water and a healthier spa.

Clean up is also easy with a twist-lock vane that removes quickly to access the built-in skimmer basket.

CUSTOMIZE THE LID
WITH YOUR LOGO

FLOATING VANE WEIR

Adjusts with water level to ensure adequate surface water skimming.

BUILT IN BASKET

Conveniently located basket makes debris removal fast and easy.

TWIST-LOCK VANE

Just a simple twist removes the vane weir, and exposes the debris basket below.

FLUSH MOUNT SPA DRAIN

DRAINING A HOT TUB JUST GOT EASIER

Featuring a 3-Step operation, this drain easily installs with a standard hole saw. Double-seal protection ensures against leaks. The flush mount design and LED ready body create a clean and attractive installed appearance on any hot tub.

DOUBLE SEAL PROTECTION

The New CMP Flush Mount Drain Valve has a seal in the body as well as the cap. This double-seal system is designed to greatly reduce possible leaks.

EASY INSTALLATION

Installation is quick and simple with a standard hole saw. The drain is designed with a 3/4" smooth barb and a locking nut with gasket.

3-STEP OPERATION

Easy as one, two, three! The intuitive valve design naturally turns to "ON" as the hose is attached, and effortlessly closes as the hose is removed. The push/pull design is quick and simple.

STEP ONE:
PULL OUT

STEP TWO:
REMOVE CAP

STEP THREE:
ATTACH HOSE
& TWIST
